Cisco Unified Video Conferencing

Duration: 3 days Price: \$1,500 (per person) Time: 9:00am – 5:00pm

A hands-on course designed to assist System Engineers and IT managers to fully understand the features, benefits and overall operation of Cisco's videoconferencing network components: MCUs, Gateway, CUVC-M, CUVC-Desktop. The course includes an overview of CUVC deployments and a high-level overview of CUVC's integration with other Cisco solutions: MeetingPlace, Video Telephony & Cisco Telepresence. Participants will learn to install, configure and maintain Cisco CUVC equipment, as well as learning basic troubleshooting skills.

Note: this course does not replace any of the existing Cisco training classes: MeetingPlace, Video Telephony (CallManager) & Cisco Telepresence.

Prerequisites: basic knowledge of TCP-IP, H.323.

Any student that needs an overview or additional hands-on training can be accommodated. Please speak to your instructor to make special arrangements.

Please return completed form to your regional Training Manager by e-mail or fax as detailed below:
