**RADVISION TO UNVEIL 3G DEVELOPER  
AND INFRASTRUCTURE SOLUTIONS AT 3GSM WORLD CONGRESS 2004**

*Company to Introduce 3G Developer Suite and  
Multimedia Streaming Module for Mobile Equipment Developers and Carriers*

**Glen Rock, New Jersey, February 6, 2004 -- RADVISION (Nasdaq: RVSN)**, a leading solution vendor for the broadband mobile carrier and telecom equipment developer, plans to announce a number of new products for the 3G market at the 3GSM tradeshow. These solutions include the launch of the company's 3G developer suite of toolkits and professional services, as well as a new streaming solution for its industry-leading viaIP multimedia communications platform. The viaIP is already in use delivering broadband multimedia services in a number of live networks and trials throughout the world.

At the show customers will also see solutions powered by the RADVISION viaIP in a number of leading equipment providers' booths. These demos will include both video telephony applications as well as multimedia streaming services to 3G devices.

RADVISION invites equipment developers, 3G mobile carriers, and complementary solution providers to e-mail [3G@radvision.com](mailto:3G@radvision.com) to schedule a one-on-one technical briefing with the Company in its executive suite at the show. Alternatively, vendors can stop by the company's suite, #M34, Hall 5, during exhibit hours to schedule a meeting.

**About RADVISION for the Service Provider Market**

RADVISION has a ten year track record in pioneering multimedia communications and conferencing solutions for the services provider market – both IP wireline and broadband wireless. The company offers infrastructure, developer toolkits, and professional services for equipment developers and service providers to develop and/or offer their customers solutions, and services a wide variety of high-revenue multimedia communications and entertainment services including: IP telephony, point-to-point video telephony, wireless to landline (IP) video connectivity services, group video chats and videoconferencing, residential video telephony, broadband remote surveillance/ monitoring, video streaming, real-time television services, video mail, and multimedia real-time gaming.

**About RADVISION**

RADVISION (Nasdaq: RVSN) is the industry's leading provider of high quality, scalable and easy-to-use products and technologies for videoconferencing, video telephony, and the development of converged voice, video and data over IP

and 3G networks. RADVISION solutions are used by equipment developers, enterprises, organizations, and wireline and wireless service provider worldwide. For more information please visit our website at [www.radvision.com](http://www.radvision.com)
