RADVISION Announces Resignation of Eli Doron

Wednesday March 12, 7:00 am ET

TEL AVIV, Israel--(BUSINESS WIRE)--RADVISION (Nasdaq: RVSN - News) reported

today that Eli Doron, President and Chief Strategy Officer, has announced his resignation from the Company to pursue other opportunities. Mr. Doron will cease to work at the Company from March 31, 2008.

Boaz Raviv, Chief Executive Officer, stated: "While we regret Eli Doron's decision to leave, we are very appreciative of the many contributions that he has made to RADVISION. Eli has played a central role in positioning RADVISION as the innovative leader in the unified communications arena and allowed us to set the stage for future growth. We wish him every success in his future endeavors."

Eli Doron commented: "RADVISION has played a major role in advancing videoconferencing technology and unified communications over the years. As a co-founder and executive who played an important role in driving the company forward, I take great pride in having been part of the company vision from the beginning."

About RADVISION

RADVISION (Nasdaq: RVSN - News) is the industry's leading provider of market-proven products and technologies for unified visual communications over IP, 3G and IMS networks. With its complete set of standards-based video networking infrastructure and developer toolkits for voice, video, data and wireless communications, RADVISION is driving the unified communications evolution by combining the power of video, voice, data and wireless - for high definition video conferencing systems, innovative converged mobile services, and highly scalable video-enabled desktop platforms on IP, 3G and emerging next-generation IMS networks. RADVISION Enhances IBM Lotus Sametime with Multiparty Audio and Video Using SCOPIA High Definition Conferencing Platform

Monday January 21, 8:00 am ET

RADVISION's SCOPIA Solution for IBM Lotus Sametime to be Demonstrated at IBM Lotusphere

ORLANDO, Fla. & TEL AVIV, Israel--(BUSINESS WIRE)--RADVISION(R) Ltd. (Nasdaq:

RVSN - News), a leading provider of video network infrastructure and developer tools for unified visual communications over IP, 3G, and emerging next-generation IMS networks, today announced that its SCOPIA Conferencing Platform will support IBM Lotus Sametime.

RADVISION's SCOPIA Conferencing Platform with SCOPIA Desktop will bring advanced

conferencing capability to IBM's next generation unified communications and collaboration platform enhancing the instant messaging and conferencing capabilities of Lotus Sametime by enabling users to create and initiate multiparty audio and video conferences directly from within Lotus Sametime. By adding RADVISION's unique video and audio plug-in to Lotus Sametime, users can easily escalate Lotus Sametime instant messaging chat sessions into full multiparty audio and video sessions on their PC and extend those conferences to other devices such as room based video conferencing systems, 3G videophones or virtually any telephone available today.

SCOPIA Conferencing Platform's high definition capabilities allow mixed conferences of HD video systems, standard definition video systems and video from desktops in the same call without requiring all participants to downgrade to their common capabilities. Each user participates in the conference at the highest capability available to them. SCOPIA provides the most affordable and flexible platform in the market with support for HD, standard definition, desktop, and 3G in a single solution with pricing and capacity optimized for each conferencing application.

SCOPIA Desktop builds upon the technology of RADVISION's Click to Meet solution for Lotus Sametime with the enhanced HD and high performance media processing capabilities of the SCOPIA Conferencing Platform underneath. These new capabilities provide a high quality conferencing experience even with limited bandwidth applications when viewing multiple participants simultaneously within Sametime.

"Integrating the advanced media processing capabilities of the SCOPIA Conferencing Platform into Lotus Sametime brings another dimension of conferencing to the Sametime unified communications environment," said Bob Romano, Vice President Enterprise Marketing. "Now Sametime users can have mixed conferences with virtually any type of device including the latest High Definition products on the market without requiring any of those devices to sacrifice quality."

RADVISION will be demonstrating the SCOPIA Conferencing Platform for Lotus Sametime at the Lotusphere 2008 Product Showcase in Orlando - booth 302 opening today.

RADVISION Selected as Unified Visual Communications Company of the Year 2007 by Industry Analyst VC Insight

Tuesday January 29, 9:15 am ET

RADVISION Wins Awards from VC Insight; SCOPIA(R) Desktop and the SCOPIA V5.5

Portfolio Recognized as Some of the Best New Video Conferencing Products of the Year 2007

TEL AVIV, Israel--(BUSINESS WIRE)--RADVISION(R) Ltd. (Nasdaq: RVSN - News), a leading provider of video network infrastructure and developer tools for unified visual communications over IP, 3G, and emerging next-generation IMS networks, today announced that the company and its products have received a series of awards from leading industry analyst Videoconferencing (VC) Insight.

RADVISION was chosen as VC Insight's "Unified Visual Communications Company of the Year 2007." In the award selection, VC Insight took the user's perspective and looked for innovation, reliability, ease of use, and price-performance.

RADVISION made significant advances in its product line in 2007, including the introduction of SCOPIA V5.5 with support for advanced high definition capabilities and optimized capacity as well as SCOPIA Desktop, resulting in an award-winning portfolio. In describing RADVISION, VC Insight noted, "RADVISION specializes in video conferencing infrastructure products. That is why Cisco OEMs some RADVISION products and why Sony and Aethra dealers offer RADVISION

SCOPIA products with their excellent SD and HD endpoints. LifeSize infrastructure products also reflect a tie in with RADVISION. That confirms SCOPIA are the best infrastructure products available."

The SCOPIA Desktop Video Conferencing client was also chosen as one of "The 10 Best New Video Conferencing Endpoints of the Year 2007." RADVISION's SCOPIA Desktop is a software based video conferencing endpoint which offers an extension of the SCOPIA conferencing platform. SCOPIA Desktop extends video

conferencing deployments based in meeting-rooms allowing remote users to connect to conferences and fully participate in audio, video, and data collaboration. SCOPIA Desktop is a Web-based plug-in client that can be used by anyone inside or outside the enterprise firewall. As stated by VC Insight, "There is no simpler way to include many sites in distant locations in a conference between two or more room-based systems."

VC Insight also recognized RADVISION's SCOPIA V5.5 conferencing platform as one of "The Two Best New Video Network Infrastructure Products of the Year 2007." The new SCOPIA V5.5 software is a system release with significant enhancements across the product line. It provides a comprehensive and affordable solution for High Definition (HD) multipoint video conferencing, including Continuous Presence and the ability to mix HD and Standard Definition (SD) video conferencing room systems and desktops in the same call without all participants downgrading to their common capabilities.

"RADVISION's innovation and attention to customer needs has captured our attention again, and we have selected them as the Unified Visual Communications Company of the Year 2007 as we did for the Year 2006," said Richard Line, Editor of VC Insight. "We like the high quality HD multipoint experience that the SCOPIA platform provides at an affordable price and the convenient way of connecting a remote or mobile worker to a video meeting."

"RADVISION has made significant advances in its product line in 2007 addressing real customer issues in deploying unified visual communications. We invite all those deploying unified communications solutions to take a serious look at our offerings," said Bob Romano, VP Enterprise Marketing for RADVISION. "We are pleased to be recognized across our solution portfolio by VC Insight."

RADVISION Receives INTERNET TELEPHONY(R) Magazine's 10th Annual Product of the Year Award

Thursday January 31, 9:00 am ET

RADVISION SIP Server Platform Recognized for Outstanding Innovation

TEL AVIV, Israel--(BUSINESS WIRE)--RADVISION(R) Ltd. (Nasdaq: RVSN - News), a

leading provider of video network infrastructure and developer tools for unified visual communications over IP, 3G, and emerging next-generation IMS networks, today announced that Technology Marketing Corporation's (TMC(R)) INTERNET TELEPHONY magazine (www.itmag.com) has named RADVISION SIP Server Platform as a recipient of its 2007 Product of the Year Award.

RADVISION SIP Server Platform is a unique software framework for the rapid development of high performance, robust and interoperable SIP applications and services for Next Generation Networks.

"The Internet Telephony distinguished award provides an additional proof that the SIP Server Platform answers the market demand for rapid and flexible development of services" said Avishai Sharlin, General Manager of RADVISION's Technology Business Unit. "Using RADVISION's SIP Server Platform Application and Service Creation Framework developers can develop complex SIP applications in fraction of the time, and maintain their competitive edge by adding new services easily as customer demands grow."

"RADVISION has proven they are committed to quality and excellence while addressing real needs in the marketplace. INTERNET TELEPHONY is pleased to grant a 2007 Product of the Year Award to their SIP Server Platform," said Rich Tehrani, TMC President and Editor-in-Chief of INTERNET TELEPHONY magazine. "We're proud to honor their hard work and accomplishments and look forward to more innovative solutions from RADVISION in the future."

RADVISION SIP Server Platform is part of a comprehensive server solution for the development and testing of SIP Network Equipment and SIP Application Servers. RADVISION also offers custom turn key server solutions.

About RADVISION

RADVISION (Nasdaq: RVSN - News) is the industry's leading provider of market-proven products and technologies for unified visual communications over IP, 3G and IMS networks. RADVISION Delivers Room System Video Conferencing Connectivity to Microsoft's Unified Communications Solution

Tuesday February 26, 9:00 am ET

New Application for Award Winning SCOPIA Conferencing Platform Provides Advanced Video Conferencing System Interoperability to Microsoft Office Communications Server (OCS) 2007

TEL AVIV, Israel--(BUSINESS WIRE)--RADVISION(R) Ltd. (Nasdaq: RVSN - News), a leading provider of video network infrastructure and developer tools for unified visual communications over IP, 3G, and emerging next-generation IMS networks, today announced the availability of a significant enhancement to the SCOPIA(R) Conferencing Platform extending Microsoft(R) Office Communications Server capabilities - the new SCOPIA Microsoft OCS 2007 Connector.

RADVISION, a Microsoft Gold Certified Partner, has been a long-established

partner with a history of support of Microsoft Real-Time Communications and Unified Communications solutions including Microsoft Live Communications Server 2003 and 2005, Outlook, and Active Directory. With the recent introduction of Microsoft Office Communications Server 2007, RADVISION is extending its support of the Microsoft Unified Communications product line with the new SCOPIA Microsoft OCS 2007 Connector.

The new SCOPIA OCS 2007 Connector enhances the Microsoft solution providing the capability for Office Communicator users to participate in conferences with standards-based video conferencing systems and devices. The SCOPIA Connector is a simple-to-use, highly flexible tool allowing OCS 2007 users to join a meeting hosted on the SCOPIA Conferencing Platform.

SCOPIA Conferencing Platform's media processing capabilities allow mixed conferences of HD video systems, standard definition video systems, and video from desktops in the same call without requiring all participants to downgrade to their common capabilities. Each user participates in the conference at the highest capability available to them. SCOPIA provides the most affordable and flexible platform in the market with support for HD, standard definition, desktop, and 3G in a single solution with pricing and capacity optimized for each conferencing application.

Benefits of the SCOPIA OCS 2007 Connector include:

- o A simple method for Office Communicator users to join SCOPIA hosted multi-party meetings.
- o Conference moderation allowing Office Communicator users to invite, disconnect, and mute participants along with controlling other important aspects of the meeting.
- o Support for HD (High Definition) providing interoperability to the latest video conferencing room systems available.
- o Connectivity to H.323, SIP, ISDN, and 3G video conferencing systems providing support for existing and future conferencing investments.
- o Full transcoding and media processing between various audio and video formats from 3G to HD video allowing each participant to utilize the highest quality available to them.
- o A highly collaborative video experience where through Continuous Presence, multiple participants can be seen simultaneously.
- o Efficient bandwidth utilization where the connection rate remains constant regardless of the number of participants viewed.

The SCOPIA Connector is available immediately and is included at no additional cost with SCOPIA 100 and 400 Conferencing Solutions.

"Extending the Microsoft Unified Communications solution with the advanced media processing capabilities of the SCOPIA Conferencing Platform provides connectivity that has been requested by many of our customers," said Zeev Bikowsky, General Manager Networking Business Unit for RADVISION. "Now Office Communicator users can have mixed conferences with nearly any type of device including the latest High Definition room systems available."

About RADVISION

RADVISION (Nasdaq: RVSN - News) is the industry's leading provider of market-proven products and technologies for unified visual communications over IP, 3G and IMS networks. With its complete set of standards-based video networking infrastructure and developer toolkits for voice, video, data and wireless communications, RADVISION is driving the unified communications evolution by combining the power of video, voice, data and wireless - for high definition video conferencing systems, innovative converged mobile services, and highly scalable video-enabled desktop platforms on IP, 3G and emerging next-generation IMS networks. For more information about RADVISION, visit www.radvision.com.

RADVISION and Alcatel-Lucent Team Up to Deliver Multipoint Video Conferencing Capability to Alcatel-Lucent's OmniTouch Unified Communications Suite

Monday March 17, 9:00 am ET

RADVISION Enables Alcatel-Lucent OmniTouch My Teamwork Conferencing and Collaboration Solution with SCOPIA(R) HD Multipoint Video Conferencing Capability

TEL AVIV, Israel--(BUSINESS WIRE)--RADVISION(R) Ltd. (Nasdaq: RVSN -News), a leading provider of video network infrastructure and developer tools for unified visual communications over IP, 3G, and emerging next-generation IMS networks, today announced that RADVISION and Alcatel-Lucent (Euronext Paris and NYSE: ALU) have teamed up to deliver multipoint video conferencing on top of the Alcatel-Lucent OmniTouch My Teamwork conferencing and collaboration application. Alcatel-Lucent's enterprise collaboration customers can now benefit from RADVISION's leading SCOPIA video conferencing platform.

OmniTouch My Teamwork, part of Alcatel-Lucent's Unified Communications offering, delivers conferencing and collaboration capabilities across any network, from any location within or outside the business to support a dynamic enterprise environment--enabling workers to stay in touch from wherever they are at any time from any device. Businesses benefit from a flexible, software and standards-based platform for easy integration into business processes with carrier-grade scalability to accommodate growth. The full feature set with presence-based calling, ad hoc, reservationless, and scheduled audio and web conferencing, secure IM and integrated peer-to-peer video empowers employees with single-click access to a range of communication media so they can choose the best method given the task to perform their jobs effectively.

The SCOPIA video conferencing platform is a complete multipoint video communications solution that delivers a very cost-effective, high quality video experience. SCOPIA's advanced media processing capabilities allow mixed conferences of HD (High Definition) video systems, standard definition end points, and video from desktops in the same call while preserving their native resolution and without requiring all participants to downgrade to their common capabilities. With SCOPIA's optimized capacity, users receive maximum value for their investment based on the video application they use - for example, in cases where HD is not fully utilized, the number of available ports for standard definition and desktop systems increases resulting in a reduced cost per port.

Additional benefits of the SCOPIA conferencing platform include:

- o Connectivity to H.323, SIP, ISDN, and 3G video conferencing systems providing support for existing and future conferencing investments.
- o Full transcoding and media processing between various audio and video formats from 3G to HD video allowing each participant to utilize the highest quality available to them.
- o A highly collaborative video experience where through HD Continuous Presence, multiple participants can be seen simultaneously.
- o Efficient bandwidth utilization where the connection rate remains constant regardless of the number of participants viewed.

"Combining RADVISION's SCOPIA video capabilities with OmniTouch My Teamwork provides us with key enhancements to our product portfolio," said Eric Penisson, vice president of Alcatel-Lucent, enterprise products. "The addition of SCOPIA positions us to increase our market penetration in the Unified Communications arena."

"Extending the Alcatel-Lucent Unified Communications solution with the SCOPIA conferencing platform provides a very advanced and affordable video conferencing solution - where users of HD, standard definition, and desktop systems can all communicate," said Zeev Bikowsky, General Manager Networking Business Unit for RADVISION. "Our unique method of advanced media processing provides great performance with affordable prices."

The joint solution will be on display at the Alcatel-Lucent booth #711 at VoiceCon in Orlando March 17-20, 2008.

Press Release
RADVISION to Showcase Advanced Video Solutions for Unified Communications at VoiceCon Orlando 2008

Source: RADVISION

Monday March 17, 9:00 am ET

RADVISION SCOPIA(TM) Technology Demonstrated At the Core of Video-enabled Unified Communications

ORLANDO, Fla. & TEL AVIV, Israel--(BUSINESS WIRE)--RADVISION(R) Ltd. (Nasdaq:

RVSN - News), a leading provider of video network infrastructure and developer tools for unified visual communications over IP, 3G, and emerging next-generation IMS networks, today announced that during March 17th - 19th at the VoiceCon exhibition in Orlando, RADVISION will demonstrate multiple technology integrations with its unified communications partners showcasing the power of unified visual communications with RADVISION technology at the core.

"Conferencing solutions are going through dramatic changes with two major trends occurring -- room based video conferencing is moving to higher video quality with high definition and telepresence, and new unified communications solutions promise to bring conferencing to the desktop and mobile users -- both driving the need for new levels of scalability and device support," said Zeev Bikowsky, General Manager Networking Business Unit for RADVISION. "We understand these needs and are very proud to show our partners' solutions leveraging our technology."

At VoiceCon booth 417, RADVISION will be demonstrating:

- o IBM Lotus Sametime with multiparty audio and video from the SCOPIA Conferencing Platform
- o Microsoft Office Communications Server 2007 video conferencing connectivity via SCOPIA
- o Cisco Unified Videoconferencing powered by SCOPIA technology
- o Cisco Unified Video Advantage with multiparty audio and video from

SCOPIA technology

IBM Lotus Sametime with multiparty audio and video from the SCOPIA Conferencing Platform

RADVISION's SCOPIA Conferencing Platform with SCOPIA Desktop brings advanced conferencing capability to IBM's next generation unified communications and collaboration platform enhancing the instant messaging and conferencing capabilities of Lotus Sametime by enabling users to create and initiate multiparty audio and video conferences directly from within Lotus Sametime. By adding RADVISION's unique video and audio plug-in to Lotus Sametime, users can easily extend Lotus Sametime instant messaging chat sessions into full multiparty audio and video sessions on their PC and extend those conferences to other devices such as room based video conferencing systems, 3G videophones or virtually any telephone available today.

Microsoft Office Communications Server 2007 video conferencing connectivity via SCOPIA

The new SCOPIA Office Communications Server (OCS) 2007 Connector enhances the latest Microsoft unified communications offering providing the capability for Office Communicator users to participate in conferences with standards-based video conferencing systems and devices. The SCOPIA Connector is a simple to use, highly flexible tool allowing OCS 2007 users to join a meeting hosted on the SCOPIA Conferencing Platform. Now Office Communicator desktop users have full interoperability with video conferencing room systems including the latest HD (High Definition) endpoints with continuous presence multipoint video.

Cisco Unified Videoconferencing powered by SCOPIA technology

The Cisco Unified Videoconferencing System is integrated into Cisco Unified Communications to enable connectivity with a broad range of room and desktop video systems and communications environments. RADVISION provides the infrastructure for Cisco Unified Videoconferencing, including MCUs, Gateways and software for setting up and managing video sessions. Cisco Unified Videoconferencing now includes a desktop video component that extends the capabilities of the Cisco Unified Videoconferencing MCU to remote users with a free, Web-based client, H.239 data collaboration, embedded firewall and NAT traversal and conference streaming. This provides the same continuous presence and data sharing capabilities as video conferencing room systems extending their reach and impact.

Cisco Unified Video Advantage with multiparty audio and video from SCOPIA technology

Cisco Unified Video Advantage adds video to the communications experience by providing video telephony functionality to Cisco Unified IP phones. Using the familiar phone interface, video calls can be made and received on the Cisco Unified IP phone with the video component displayed on a PC. Leveraging RADVISION SCOPIA technology, the solution delivers advanced multiparty desktop video conferencing, and connectivity with third-party systems, that supports existing and future conferencing investments.

Additional demonstrations at VoiceCon showcasing RADVISION technology include Alcatel-Lucent OmniTouch My Teamwork integrated with RADVISION's SCOPIA video conferencing platform at Alcatel-Lucent's booth 711; and Cisco Unified Contact Center Enterprise integrated with RADVISION's SCOPIA Interactive Video Platform at Cisco's booth 601.

RADVISION's ProLab(TM) Video Test Solution Offers Standards-Based Video Quality Assurance

Monday March 17, 9:00 am ET

Media Quality Analysis to Enhance ProLab Testing Suite for Next Generation Network Operators, Service Providers and User Equipment Vendors

TEL AVIV, Israel--(BUSINESS WIRE)--RADVISION(R) (Nasdaq: RVSN - News), a leading provider of video network infrastructure and developer tools for unified visual communications over IP, 3G, and emerging next-generation networks, today announced the worldwide availability of its ProLab(TM) Video Quality Test Solution.

The ProLab Video Quality Solution is part of RADVISION's ProLab Test Management Suite, providing IMS, SIP, H.323 and 3G-324M testing in a single, easy-to-use product. ProLab Testing Suite is designed to play a critical and vital role in the product development and quality assurance cycles, helping equipment vendors and service providers to develop high-end video telephony services. The Suite evaluates both video and IP telephony service performance at the same time.

"Since video quality is an important parameter in measuring the reliability of a network and the readiness of the video service, it is very important to constantly examine network conditions to ensure reliability and quality of service," said Elie Cohen, Product Manager in RADVISION's Technology Business Unit.

"Every comprehensive network check should include reliable software that automatically and objectively checks video quality online," added Cohen.

ProLab Video Quality Online No-Reference-Based is the first complete testing solution for measuring emerging IMS and Video Quality, performing protocol, media and quality analysis. The solution combines ITU-T G.1070 methodologies for Objective Video Quality with the in-depth results obtained from RADVISION's extensive Human Vision video quality experiments based on subjective methodologies laid out in ITU-R BT.500-9.

The ProLab Video Quality Testing Solution offers users unique insight into video quality experience. "Combining the human vision Subjective results with those obtained using ITU-T G.1070's objective input enables us to ensure we can

deliver the optimum video quality for every operational scenario," Cohen said. ProLab can also be used to perform Service Level testing and to enhance development speeds, leveraging an extensive library of media types to emulate virtually any end device. Designed for ease of use ProLab supports the following environments: 3G-324M, IMS, SIP and H.323.

RADVISION REPORTS FOURTH QUARTER AND FULL YEAR 2007 RESULTS

Thursday February 7, 8:00 am ET

FOURTH QUARTER REVENUES ARE \$22.3 MILLION; GAAP DILUTED EPS IS \$0.11; NON-GAAP DILUTED EPS IS \$0.18 BEFORE FAS123R EFFECT

TEL AVIV, Israel--(BUSINESS WIRE)--RADVISION(R) (Nasdaq: RVSN - News) today

reported that revenues for the fourth quarter of 2007 were \$22.3 million, in line with the Company's forecast, compared to revenues of \$25.3 million reported in the fourth quarter of 2006.

The Company incurred an operating loss of \$0.2 million for the fourth quarter of 2007 compared with operating income of \$3.4 million in the fourth quarter of 2006. Excluding the effects of stock-based compensation expense related to the adoption of FAS123R in both periods, non-GAAP operating income was \$1.1 million in the fourth quarter of 2007 compared with \$4.7 million in fourth quarter of 2006.

Net income for the fourth quarter of 2007 was \$2.5 million, or \$0.11 per diluted share, compared with \$7.2 million, or \$0.31 per diluted share, in the 2006 fourth quarter. Excluding the effect of stock-based compensation expense (which amounted to \$1.4 million or \$0.07 per diluted share in the 2007 fourth quarter and \$1.3 million or \$0.06 per diluted share in the 2006 fourth quarter), non-GAAP net income for the fourth quarter of 2007 was \$3.8 million, or \$0.18 per diluted share, compared with \$8.5 million, or \$0.37 per diluted share, reported in the fourth quarter of 2006.

The Company had forecast that net income for the fourth quarter of 2007 would approximate \$1.2 million or \$0.06 per diluted share including a tax benefit of \$0.1 million and stock-based compensation expense of \$1.4 million related to the adoption of FAS123R. The Company recorded a higher tax benefit, totaling \$1.6 million and equivalent to \$0.07 per diluted share, for the 2007 fourth quarter, which compares with a tax benefit of \$2.1 million, equivalent to \$0.09 per diluted share, in the fourth quarter of 2006. The stock-based compensation expense was in line with the Company's forecast. The Company further noted that its financial income for the fourth quarter of 2007 was reduced by \$380,000, equivalent to \$0.02 per diluted share, due to valuation allowance of certain investment securities.

Business unit revenues for the fourth quarter of 2007 consisted of \$17.1 million in Networking Business Unit (NBU) sales compared with \$18.9 million in the fourth quarter of 2006, and \$5.2 million in Technology Business Unit (TBU) sales compared with \$6.4 million in the 2006 fourth quarter.

For the full year 2007, revenues were \$92.0 million, operating income was \$2.0 million and net income was \$9.9 million or \$0.44 per diluted share. Excluding the effect of stock-based compensation expense (which amounted to \$5.4 million or \$0.24 per diluted share), non-GAAP operating income for 2007 was \$7.4 million and net income was \$15.3 million or \$0.68 per diluted share. For full year 2006, revenues were \$91.0 million, operating income was \$8.5 million and net income was \$15.2 million or \$0.67 per diluted share. Excluding the effects of stock-based compensation expense (amounting to \$4.8 million and equivalent to \$0.21 per diluted share) and a patent settlement reserve recognized in the 2006 third quarter (of \$1.9 million, and equivalent to \$0.08 per diluted share), operating income for full year 2006 was \$15.2 million and net income was \$21.9 million or \$0.96 per diluted share, on a non-GAAP basis.

The Company ended 2007 with approximately \$130.7 million in cash and liquid investments, equivalent to \$6.09 per basic share, a decrease of \$4.5 million from September 30, 2007. The decrease reflects a decrease in cash flow from operating activities of \$0.2 million, which includes one time amortization of auction rate securities in the amount of \$0.6 million, by the use of \$4.0 million for the repurchase of 351,179 Company shares and \$0.3 million of capital expenditures.

Boaz Raviv, Chief Executive Officer, commented: "The successful introduction of our SCOPIA 5.5 platform with High Definition Continuous Presence enabled us to regain our footing in the fourth quarter. The technology and cost advantages of SCOPIA 5.5, which includes SCOPIA Desktop for easy connectivity between room conferencing systems and the desktop, enabled us to make additional inroads in our market. Sales through our reseller channel increased 49% sequentially. Our fourth quarter results also included higher than forecasted sales through Cisco, our largest channel partner, which rose 15% from the third quarter of 2007."

Mr. Raviv added: "Positive momentum in our marketplace, especially in enterprise, and a favorable competitive environment further supported our progress in the fourth quarter. As the only independent networking infrastructure provider, we now have a singular opportunity to build market share, resume our growth and accelerate our progress. We plan to pursue that opportunity aggressively. We have unified our Networking Business Unit to sharpen our focus on the enterprise market. We will increase our investment in R&D and marketing and sales in our NBU in 2008 to support and expand our OEM and reseller channels and deliver additional market-leading technology. We also will continue to invest in the product development roadmap of our Technology Business Unit. Although TBU revenues were less than forecast in the fourth quarter due to deal slippage, it continues to build our reputation as a technology leader with award-winning products and advances in SIP Server and IMS technology. We expect our investment company-wide to begin benefiting our revenues and operating profitability in the second half of the year."

GUIDANCE

The following statements are forward-looking, and actual results may differ materially.

The Company expects to report revenues for the first quarter of 2008 of approximately \$20.0 million and a net loss of approximately \$3.5 million or \$0.18 per diluted share. This includes stock-based compensation expense related to the adoption of FAS123R of \$1.4 million or \$0.07 per diluted share. Excluding this item, the first quarter 2008 non-GAAP net loss is expected to be \$2.1 million or \$0.11 per diluted share. That compares to first quarter 2007 revenues of \$24.3 million, including \$1.3 million related to the DVS II contract, and net income of \$3.5 million or \$0.15 per diluted share, which included stock-based compensation expense of \$1.3 million or \$0.06 per diluted share related to the adoption of FAS123R. Excluding the effect of stock-based compensation expense, net income for the first quarter of 2007 was \$4.9 million or \$0.21 per diluted share. (Full details are available on the Company's web site at www.radvision.com.)

GAAP VERSUS NON-GAAP PRESENTATION

To supplement the consolidated financial statements presented in accordance with generally accepted accounting principles ("GAAP"), the Company uses non-GAAP measures of operating results, net income and earnings per share, which are adjusted from results based on GAAP to exclude the expenses recorded for stock compensation in accordance with SFAS 123(R). These non-GAAP financial measures are provided to enhance overall understanding of the current financial performance and prospects for the future. Specifically, the Company believes the non-GAAP results provide useful information to both management, and investors as these non-GAAP results exclude the expenses recorded for stock compensation in accordance with SFAS 123(R) that the Company believes are not indicative of the core operating results. Further, these non-GAAP results are one of the primary indicators management uses for assessing the Company's performance, allocating resources and planning and forecasting future periods. These measures should be considered in addition to results prepared in accordance with GAAP, but should not be considered a substitute for or superior to GAAP results. These non-GAAP measures may be different than the non-GAAP measures used by other companies.

FOURTH QUARTER 2007 EARNINGS CONFERENCE CALL/WEBCAST

RADVISION will hold a conference call to discuss its fourth quarter 2007 results and first quarter 2008 outlook, today, Thursday, February 7, at 9:00 a.m. (Eastern). To access the conference call, please dial 1-877-601-3546 (International dialers may call +1-210-839-8500) by 8:45 a.m. (Eastern). The passcode "RADVISION" will be required to access the live conference call. A live webcast of the conference call also will be available on the Company's website and archived on the site until the next quarter. Simply click on the following link or copy it onto your browser: www.radvision.com/Corporate/Investors/FinancialReports/. A replay of the call will be available beginning approximately one hour after the conclusion of the call through 11:00 p.m. (Eastern) on February 14th. To access the replay, please dial 1-866-516-0670 (International dialers may call +1-203-369-2034).

The PowerPoint presentation highlighting key financial metrics as well as the first quarter 2008 estimate also will be available in the Investor Relations section of the company's website. The presentation will be available beginning at 8:00 a.m. (Eastern) on February 7th and will be archived on the website until the end of the first quarter.

ABOUT RADVISION

RADVISION (Nasdaq: RVSN - News) is the industry's leading provider of market-proven products and technologies for unified visual communications over IP and 3G networks. With its complete set of standards-based video networking infrastructure and developer toolkits for voice, video, data and wireless communications, RADVISION is driving the unified communications evolution by combining the power of video, voice, data and wireless - for high definition videoconferencing systems, innovative converged mobile services, and highly scalable video-enabled desktop platforms on IP, 3G and emerging next-generation networks. For more information about RADVISION, visit www.radvision.com.

THIS PRESS RELEASE CONTAINS FORWARD-LOOKING STATEMENTS THAT ARE SUBJECT TO RISKS AND UNCERTAINTIES. FACTORS THAT COULD CAUSE ACTUAL RESULTS TO DIFFER MATERIALLY FROM THESE FORWARD-LOOKING STATEMENTS INCLUDE, BUT ARE NOT LIMITED TO, GENERAL BUSINESS CONDITIONS IN THE INDUSTRY, CHANGES IN DEMAND FOR PRODUCTS, THE TIMING AND AMOUNT OR CANCELLATION OF ORDERS AND OTHER RISKS DETAILED FROM TIME TO TIME IN RADVISION'S FILINGS WITH THE SECURITIES EXCHANGE COMMISSION, INCLUDING ITS ANNUAL REPORT ON FORM 20-F. THESE DOCUMENTS CONTAIN AND IDENTIFY OTHER IMPORTANT FACTORS THAT COULD CAUSE ACTUAL RESULTS TO DIFFER MATERIALLY FROM THOSE CONTAINED IN OUR PROJECTIONS OR FORWARD-LOOKING STATEMENTS. STOCKHOLDERS AND OTHER READERS ARE CAUTIONED NOT TO PLACE UNDUE RELIANCE ON THESE FORWARD-LOOKING STATEMENTS, WHICH SPEAK ONLY AS OF THE DATE ON WHICH THEY ARE MADE. WE UNDERTAKE NO OBLIGATION TO UPDATE PUBLICLY OR REVISE ANY FORWARD-LOOKING STATEMENT.

RECONCILIATION OF GAAP TO NON-GAAP OPERATING RESULTS

To supplement the consolidated financial statements presented in accordance with generally accepted accounting principles ("GAAP"), the Company uses non-GAAP measures of operating results, net income and earnings per share, which are adjusted from results based on GAAP to exclude one time patent settlement reserve and the expenses recorded for stock compensation in accordance with SFAS 123(R). These non-GAAP financial measures are provided to enhance overall understanding of the current financial performance and prospects for the future. Specifically, the Company believes the non-GAAP results provide useful information to both management, and investors as these non-GAAP results exclude one time patent settlement reserve and the expenses recorded for stock compensation in accordance with SFAS 123(R) that the Company believes are not indicative of the core operating results. Further, these non-GAAP results are one of the primary indicators management uses for assessing the Company's performance, allocating resources and planning and forecasting future periods. These measures should be considered in addition to results prepared in accordance with GAAP, but should not be considered a substitute for or superior to GAAP results. These non-GAAP measures may be different than the non-GAAP measures used by other companies.

The following table reconciles the GAAP to non-GAAP operating results:
