

Telenet GmbH Kommunikationssysteme, one of Europe's leading specialists for interactive voice dialogue solutions, has joined the list of valued RADVISION resellers and will distribute RADVISION's [ProLab® Test Management Suite](#).

Telenet markets, distributes and supports RADVISION's ProLab Suite in the German-speaking countries of Europe, including Germany, Switzerland and Austria.

"We are excited about our alliance with RADVISION. When we were looking to add an advanced testing tool to our portfolio, we came straight to the market leader. ProLab offers our customers everything they need for testing and analysis in 3G, SIP, H.323 and of course, IMS. As the industry moves toward IMS, RADVISION's undisputed expertise in this area made it the only choice for us."

*Jörg Emonts, General Manager, Telenet GmbH
Kommunikationssysteme*

"We understand that the local connection is very important, especially when it comes to testing and analysis. Telenet has vast experience testing all types of complex scenarios and topologies. ProLab offers the expertise and experience necessary for these types of cases. It is a robust tool with built-in tests cases, as well as a solution for video and audio quality measurement."

*Elie Cohen, ProLab Product Manager, RADVISION
Technology Business Unit*

- [ProLab IMS Test Solution](#)
A powerful and highly versatile set of tools to facilitate testing and pre deployment of IMS applications while reducing time and costs.
- [ProLab 3G-324M Test Solution](#)
Includes full 3G-324M call simulation, analysis, media quality and 3G-324M calls interception and analysis.
- [ProLab SIP Test Solution](#)
A comprehensive Testing solution to simulate Calls Simulation UAC or/and UAS, protocol and Media Analysis , media quality and Full SIP Server simulation.
- [ProLab H.323 Test Solution](#)
Performs advanced H.323 simulation by generating H.323 traffic to a DUT protocol and media analysis, media Quality and Full Gatekeeper simulation.

About Telenet GmbH

Telenet GmbH Kommunikationssysteme is one of the leading specialists in the German-speaking region for interactive voice dialogue solutions as well as test solutions for VoIP, Voice, Video, voice applications and Contact Centers. Voice applications from Telenet have been deployed by service providers in the financial and telecommunications segments as well as in transport, traffic and freight management where customer-friendly partially or fully automatic telephone services are required. Telenet's test solutions guarantee a reliable and smooth operation during the entire life cycle of components, applications, services and functions - from the initial development stages to their integration and operation.
