

SCOPIA Conferencing Platform for IBM. Lotus. Sametime.

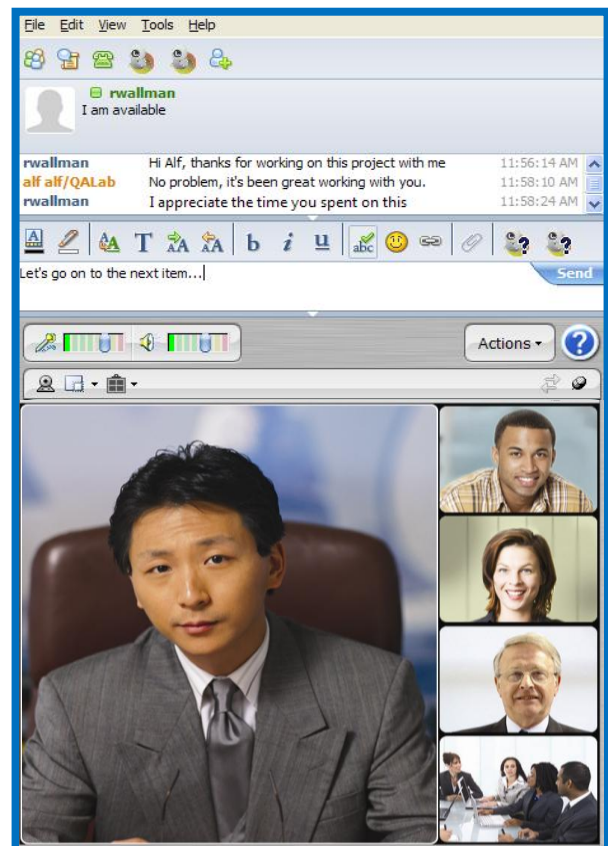

RADVISION brings advanced conferencing capability to IBM's next generation real time collaboration platform

RADVISION's SCOPIA maximizes your Sametime real-time collaboration investment by turning it into a complete conferencing solution. The SCOPIA Conferencing Platform with SCOPIA Desktop enables users to create and initiate multiparty audio and video conferences directly from within Lotus Sametime. By adding RADVISION's unique video and audio plug-in to Lotus Sametime, users can now escalate Lotus Sametime Instant Messaging chat sessions into full multiparty audio and video conferences and extend those conferences to other devices such as standards-based video conferencing systems, 3G videophones or virtually any telephone available today. RADVISION's solution facilitates remote team collaboration with group communication and multi-device reach, extending the reach of the IBM Sametime real-time collaboration environment to those who are not at their PCs.

SCOPIA Features & Benefits

- Adds multi-participant audio & video to Sametime Instant Messaging
- Users can create and initiate audio & video conferences directly from Sametime, escalating Instant Messaging sessions into multi-party audio & video sessions
- Continuous Presence to see multiple participants
- Interoperability providing audio & video connectivity to Sametime using PC web cams, video conferencing systems, 3G video phones, standard and VoIP phones
- Mix HD (High Definition) and standard room systems and desktops in the same call without all participants downgrading to their common capabilities
- Improves productivity by virtually bringing together geographically dispersed individuals and teams
- Enables faster, more informed decision-making by bringing experts together - spontaneously or in a structured fashion
- Reduces total cost of ownership by providing a set of real-time capabilities in an integrated product offering

About RADVISION

RADVISION (NASDAQ: RVSN) is the industry's leading provider of market-proven products and technologies for unified visual communications over IP and 3G networks. With its complete set of standards-based video networking infrastructure and developer toolkits for voice, video, data and wireless communications, RADVISION is driving the unified communications evolution by combining the power of video, voice, data and wireless - for high definition video conferencing systems, innovative converged mobile services, and highly scalable video-enabled desktop platforms on IP, 3G and emerging next-generation IMS networks. For more information about RADVISION, visit www.radvision.com. Product specifications subject to change without notice. RADVISION and SCOPIA are registered trademarks of RADVISION, Ltd. IBM, Lotus, and Sametime are trademarks of International Business Machines Corporation in the United States, other countries, or both.
