RADVISION TOOLKITS NOW AVAILABLE FOR GREEN HILLS' INTEGRITY REAL-TIME OPERATING SYSTEM

*RADVISION's Advanced MGCP, MEGACO/H.248, and RTP/RTCP
Developer Platforms Ideal of Use in Developing Embedded Chipsets*

Glen Rock, New Jersey, September 17, 2003 -- RADVISION (NASDAQ: RVSN) today announced that its MGCP, MEGACO/H.248, and RTP/RTCP Developer Toolkits fully support the Green Hills Software Real-Time Operating System (RTOS). This operating system is the fastest growing platform for system level Power PC/ARM processors.

INTEGRITY® is a secure, royalty-free RTOS intended for use in embedded systems that require maximum reliability. INTEGRITY represents the most advanced RTOS technology in the market today and provides maximum functionality and security with minimal operating system overhead.

“Developers of integrated chip-level systems to support voice and multimedia over IP have been embracing Green Hill’s INTEGRITY for its ease of use and high reliability with low processing overhead,” said Jacob Bridger, VP of Marketing and Sales for RADVISION Technology Business Unit. “Combining the power of RADVISION’s MGCP, MEGACO/H.248, and RTP/RTCP Developer Toolkits with the power of INTEGRITY’s operating system was a natural fit.”

"Developers in the communications equipment market require comprehensive software tools and real-time operating systems in order to develop and deploy highly reliable products in the least amount of time," said Robert Redfield, Director of Partner Programs at Green Hills Software. "RADVISION's developer kits, combined with MULTI and INTEGRITY, provide customers with a feature rich, easy-to-use development environment. Green Hills is pleased to partner with RADVISION and welcomes them as a program partner."

About RADVISION

RADVISION (Nasdaq: RVSN) is the industry's leading provider of high quality, scalable and easy-to-use products and technologies for videoconferencing, video telephony, and the development of converged voice, video and data over IP and 3G networks. For more information please visit our website at www.radvision.com

About Green Hills Software, Inc.

Founded in 1982, Green Hills Software Inc. is the technology leader for real-time operating systems and software development tools for 32- and 64-bit embedded systems. Green Hills Software's royalty-free INTEGRITY® real-time operating system, fully integrated with its market leading compilers and MULTI® Integrated Development Environment, provides a total development and run-time solution that addresses both deeply embedded and maximum reliability applications.

Green Hills Software is headquartered in Santa Barbara, CA, with European headquarters in the United Kingdom. For more information on Green Hills Software products, call 805-965-6044, email sales@ghs.com
