RADVISION EXPANDS ITS OPERATIONS INTO INDIA WITH ADVANCED VIDEOCONFERENCING INFRASTRUCTURE SOLUTIONS

Newest Office Reflects Continued Growth of RADVISION Efforts in Asia Pacific

Glen Rock, New Jersey and New Delhi, India, May 19, 2003 -- RADVISION (Nasdaq: RVSN), a leading provider of videoconferencing and video telephony network infrastructure solutions, today announced that it is expanding its presence into the Indian market with the opening of its first sales office. Based in New Delhi, this office will be responsible for the support and marketing of RADVISION's complete line of videoconferencing products, providing both the platform and applications to enable advanced conferencing and data collaboration.

Following recent new office openings in South America, China and Japan, the Indian office is the latest global business expansion the company has undertaken in areas with availability of relatively new telecom and IT broadband infrastructure, bringing its complete line of award-winning videoconferencing products to these new markets. All RADVISION products from its two product families, *viaIP™* and *INVISION™*, will work over any type of communications network, including ISDN, SIP, IP, and next-generation 3G, enabling businesses to leverage their existing infrastructure while allowing an easy migration path to emerging new networks and end points.

“We have seen a steady increase in demand occur throughout India as organizations in all sectors begin to recognize the value and benefits of interactive voice and video communications,” said Adit Tevel, Senior VP of International Sales for RADVISION's Networking Business. “The demand for secure, high-quality videoconferencing equipment in India is being driven by the improvement and expansion of its telecom and IT infrastructure. With high-speed networks rapidly gaining acceptance, the infrastructure is now in place to support advanced multimedia communication and collaboration services. At this time the

Indian market offers great growth potential and I believe this is a tremendous opportunity for RADVISION as we continue to expand our business globally and grow our position as a market leader.”

Initial key markets in India include government and enterprise. Additionally, the company plans to focus on the service provider market, leveraging the unique RADVISION platform which gives carriers a competitive advantage by providing them with the ability to offer managed video communications services to new and existing residential and enterprise subscribers.

Leading the new office is Sadhanand Rajanga, who has been named India Country Manager. Sadhanand brings to RADVISION valuable knowledge of the local markets and many years of experience in developing marketing infrastructure solutions and value-added applications. Prior to RADVISION, Sadhanand served for seven years as Chief of Marketing, IT & Telecom International Business, with Escorts Ltd, a leading corporation in India. Prior to that he was the Senior Manager of New Products for HCL Group, a leading IT company and as Bank of America’s Operations Manager -Value Banking.

“India is important to the company’s success and I am confident that Sadhanand, with his accomplished track record in the industry, will help us drive business in the region and contribute to RADVISION’s continued success in bringing to market advanced video conferencing, multimedia communication and collaboration services,” Adit stated.

New Delhi Office Contact Information

Sadhanand Rajanga, Chintels Business Centre, Chintels House, A-11, Kailash Colony, New Delhi, 110048, India. Tel: +91-11-26238620, Fax: +91-11-26464595, Mobile: +91-98910-72211, E-Mail: rajanga@radvision.com.

RADVISION provides two lines of videoconferencing solutions:

About *via*IP

RADVISION’s *via*IP product line is a customizable, scalable array of ports, management solutions, and custom functionality with which customers can design and quickly deploy a highly configured, high scalable visual communications network ideal for each client’s unique needs. With the *via*IP solution the customer simply chooses the ideal port configuration, management solution and additional applications and the entire solution is delivered in an integrated chassis.

About INVISION

RADVISION's product line is a suite of plug-and-play videoconferencing network appliances that offer an off-the-shelf, completely preconfigured solution with all the functionality of an entire IP/ISDN videoconferencing infrastructure, from centralized management and multipoint conferencing to gateway services and value-added applications, in an integrated, easy-to-order and easy-to-install device.

About RADVISION

RADVISION Ltd. (Nasdaq: RVSN) is the industry's leading provider of high quality, scalable and easy-to-use products and technologies for videoconferencing, video telephony, and the development of converged voice, video and data over IP and 3G networks.
